

# Products list

## *To hand-made products of Fosa-dog company*

(part of terms & conditions [www.fosa-dog.com/en](http://www.fosa-dog.com/en) )

### Materials:

#### + **Nylon**

- Polypropylene (PP) strap, the most common single strap thickness is 1.5 mm, then 1.2 or 1 mm according to the manufacturer or available colors.

#### + **Ribbon**

- *Grosgrain ribbons* with available pattern and in various widths. Material polyester.
- *Printed ribbons* with available pattern and in various widths. Ribbon printing is disturbed both mechanically and due to different temperatures or moisture.

#### + **Belt buckle**

- *Metal - polished steel (PO)* - stainless steel (SS), load limit 400 kg (width 2,5cm), 330 kg (width 3 cm and 4 cm) and 500 kg (width 5cm).
- *Metal - black - steel (ST)*, surface treatment matt black (BK) (impact toughness, color is easily scabed by sharp objects and no resistance to metal - metal contact). Load capacity 200 kg (width 2,5 cm) and 300 kg (width 3 cm and 4 cm).
- *Buckle with two spines - 5cm - steel (ST)*, chrome-plated (CT), maximum load 450 kg.

#### + **Trident**

- *Plastic 2.5 cm* - acetal (POM) material. Breaking load 55 kg.
- *Metal - Zinc alloy (ZDC)*, nickel (NP). 200kg breaking load.
- *Metal - black - material zinc alloy (ZDC)*, surface treatment matt black (BK) (impact toughness, color is easily scabed by sharp objects and no resistance to metal - metal contact). 200kg breaking load.

#### + **Snap-hook**

- *Chromium - Zinc alloy (ZDC)*, chrome (CP). Breaking load from 150 to 250kg depending on size.
- *Black - Zinc alloy (ZDC)*, surface treatment matt black (BK) (impact toughness, color is easily scabed by sharp objects and no resistance to metal - metal contact). Breaking load from 150 to 250kg depending on size.

#### + **D-ring**

- *Stainless* - stainless steel (SS), polished steel (PO). Solid welded joint. Breaking load 250kg (2.5 width), 350kg (3cm and 4cm width) and 390kg (5cm width).
- *Black* - steel (ST), surface treatment matt black (BK) (impact toughness, color is easily scabed by sharp objects and no resistance to metal - metal contact). Solid welded joint. Breaking load 220kg (2.5cm width), 270kg (3cm width), 300kg (4cm and 5cm width).

#### ✚ Ring

- *Stainless* - stainless steel (SS), polished steel (PO). Solid welded joint. Breaking load 150 - 300kg depending on size.
- *Black* - steel (ST), surface treatment matt black (BK) (impact toughness, color is easily scabed by sharp objects and no resistance to metal - metal contact). Solid welded joint. Breaking load 200kg - 300kg depending on size

#### ✚ Grommets

- *Collars in width 2,5 and 3 cm* - material stainless steel (SS), finish polished steel (PO).
- *Collars 4 and 5 cm* - material steel (ST), surface treatment nickel (NP).
- *Black grommets (all widths)* - material steel (ST), surface treatment old copper (AC).

#### ✚ Rivets

- *Nickel* - material steel (ST), surface treatment nickel (NP).
- *Black* - material steel (ST), surface treatment copper (AC).

#### ✚ Threads

- *Jeans threads* – material 100% polyester, thread thickness 0,5mm, tex 30x3, high strength.

### Údržba:

#### ✚ Products – just from nylon

- Machine washable up to 40 ° C without bleaching or other aggressive cleaning agents.
- Do not clean chemically.
- Do not dry in the dryer.
- Do not iron.

#### ✚ Products – nylon + ribbon

- It is recommended not to wash in an automatic washing machine.
- Handle with care when wet.
- Do not use bleach or other aggressive cleaners.
- Do not clean chemically.
- Do not iron.
- Do not dry in the dcer.

✚ When washing in an automatic washing machine, we recommend wrapping the metal parts of the products (buckles, snap-hooks, tridents, etc.) in a cloth (eg sock, elastic bandage, bandage) to protect both the washing machine and the metal parts of the product.

✚ Although our products are intended for animals, it is recommended not to expose them to moisture and wet for a long time. If this happens (walking in the rain, outdoor bathing, etc.), please let the product dry in the sun or at home in a dry place.

✚ Metal parts of the product that are not made of stainless steel may be subject to corrosion.

✚ Please remember that the nylons and ribbons of which our products are made were not made purely for use in the everyday life of a "four-legged" family member 😊 But we still hope for their long lifetime 😊

*Team Fosa-dog*
